

Tablekeeper

Four stages.
Reservations kept consistent.

Three BAND seats. Independent review.

4/4 public stage claims accepted

Accepted revision: 96ab4b8

INDEPENDENTLY CHECKED RESULT

**Four complete
service stages**

Source and original room preserved

Separate implementation from acceptance

01	02	03
Coordinator	Builder	Verifier
Carries the contract and routes the work	Implements the service and preserves stages	Reviews the exact revision and can require changes

V2 seats: gpt-6-sol / medium

Generic mandates; exact-revision independent review

Independent review changed the code

01 Public harness

Passed the earlier revision

02 Independent review

Found a tampered-plan import defect

03 Builder correction

Invalid import: 422; no state change

04 Exact-revision review

ACCEPT at 96ab4b8

Original rejection, correction and acceptance preserved in the room

A complete service at each stage

FOUR STAGE FOLDERS

Docker service

Browser UI, contract API and /health readiness

STATE HANDLING

Atomic import and export

In-memory state

No external model or API required at runtime

Actual post-terminal app capture; synthetic demonstration data

Public checks tied to the exact revision

Evidence	Result	Revision
Stage 1 isolated	PASS	96ab4b8
Stage 2 isolated	PASS	96ab4b8
Stage 3 isolated	PASS	96ab4b8
Stage 4 isolated	PASS	96ab4b8
Offline: gates 1, 2 + mandates	exit 0	Package

40h49 elapsed · includes quota waits and outages

Public checks are partial; private evaluation remains unknown.

Reproducible source, transparent history

Contract handoff

Stage preservation

Independent revision review

Accepted local result

4 stages

Recovery between stages and during stage 4
Same agents and threads; one human notice
No operator production-code edits

Original history preserved; uninterrupted autonomy is not claimed.
